INTRODUCTION

I'm a Full Stack Developer with 10+ years of experience on software development.

I used to spend most of my time studying modern technologies and software architecture.

Since 2017 I've been working with VueJS, Laravel or Spring boot to web and flutter to mobile stack.

I can use other frameworks and tools like ReactJS our React native too.

I also know much about relational databases, big data manipulation such as ETLs, Self-BI, and of course DevOps and Cloud Services such as Docker, Jenkins, CI/CD pipelines, AWS, or Google cloud services.
